PROJECTS

SkillBridge AI | Next.js, TypeScript, Prisma ORM, AWS Aurora PostgreSQL
- Built a career and placement preparation platform for engineering students.
- Implemented personalized career recommendations, skill-gap calculation, three-level learning roadmaps, job application tracking and a resume compliance checker.
- Designed a responsive glassmorphism interface with a LocalStorage fallback.

NovaMind Cloud | Next.js 16, React 19, Vercel
- Developed and deployed a responsive data integrity and system monitoring platform.
- Built a command center dashboard for integrity SLA, latency, logs and alerts, an AI incident-response console, and a block-corruption simulator.

AtomQuest Real-Time Video Support Platform | Node.js, Express, Socket.io, React, Vite
- Built for the AtomQuest Hackathon 1.0 Grand Finale.
- Implemented server-routed video sessions with text and file exchange, an AR drawing overlay, client-side session recording, and a 15-second reconnect grace window.

AgroVision AI | Python, TensorFlow, Keras
- Explored the PlantVillage dataset and trained a Keras image classification model for plant disease classes.
- Saved class names and tested predictions on sample images.

INTERNSHIPS AND VIRTUAL EXPERIENCE

Infosys Virtual Internship 6.0 | 1 month
- Worked on a digital civic engagement and petition platform.

Deloitte Job Simulation (Forage) | Virtual
- Completed a virtual job simulation program.

Tata Job Simulation (Forage) | Virtual
- Completed a virtual job simulation program.

HACKATHONS

- AtomQuest Hackathon 1.0: Grand Finale participant
- MSME Idea Hackathon 6.0: submitted ideas through the college incubator
